TO: Interested Land Owners and Land Managers

FROM: Rebecca Lafreniere, Chief, Community Health Division of the Department of Environmental Health

SUBJECT: FY 13/14 FUNDING FOR VECTOR HABITAT REMEDIATION PROGRAM

The County of San Diego is seeking grant applications for projects to be funded under the Competitive Grant Funding program of the Vector Habitat Remediation Program. Projects funded under this request for grant applications will focus on comprehensive solutions for source reduction of mosquito breeding habitat through physical modification in mosquito breeding problem areas. These projects may involve a variety of activities, such as modifying tidal flow in lagoons, management of stream discharge, manipulation of stormwater retention time, vegetation removal, and wetland restoration/redesign. Project applicants must demonstrate that projects will be carried out in a manner that complies with land use regulations and applicable local, state, and federal wetland and endangered species regulations, and that minimizes adverse effects on protected species and habitats.

Project funding will be provided to either “turn-key” projects, i.e. projects in which all permitting and environmental compliance has been completed and project implementation is ready to go, “study” projects which will include planning and permitting activities necessary prior to project implementation, or projects that are a combination. In addition, project applicants can submit proposals for “assistance” projects in which the applicant requests County involvement for any aspect of implementation, including but not limited to, permitting, coordination with regulatory agencies, developing project plans, vegetation removal, and other related activities.

Multiple projects will be funded under this Grant Program. An individual project cannot exceed \$500,000 during this funding period.

The County will accept proposals only for sites within San Diego County, including within incorporated cities. Federal and Tribal lands are excluded, because those lands do not pay the assessments that fund this program. Proposals may be submitted by property owners, designated land managers, or other entities or individuals authorized by the owner or land manager.

The grant submission application and conceptual proposal (optional) are due to the County of San Diego Department of Environmental Health by 4 p.m. on June 28, 2013 and the detailed proposal is due by 4 pm PST on August 5, 2013. All questions or inquiries to be directed to Mr. Greg Slawson, Gregory.Slawson@sdcounty.ca.gov, 858-495-5358, County of San Diego Department Environmental Health, 5570 Overland Avenue, Suite 102, San Diego, CA 92123.
